

Electricity delivery price schedule for EA Networks

(applicable from 1 April 2025)

This schedule lists the prices that EA Networks uses to charge electricity retailers for the electricity delivery service in its Ashburton based network area. Full details of how we categorise connections, measure quantities and apply prices are available in our Pricing Policy document on our website. The delivery service includes the transmission and distribution of electricity to homes and businesses, but does not include the cost of the electricity itself. Please refer to your electricity retailer for details of retail electricity prices. EA Networks is the trading name of Electricity Ashburton Limited. Our offices are at 22 JB Cullen Drive, Ashburton Business Estate, Ashburton. You can call us on 0800 430 460, send us an email at enquiries@eanetworks.co.nz, or visit www.eanetworks.co.nz.

Refer to our Pricing Policy document available on our website for details on how we categorise connections, establish chargeable quantities and apply prices. This document also explains a number of conditions and restrictions on how prices are applied.

For General supply controlled load options GCOP, G10N, G10N (marked *):

These are for hard-wired appliances only (excluding electric vehicle chargers), where all connected load is measured by a dedicated meter (or meter element), and that load is controlled by a suitable ripple relay receiver.

Common register configurations are provided in the description where relevant. Refer to our Pricing Policy document for further details and treatment of other register configurations.

General connections categorised as GS69, G100, G150 and G300 that made use of the controlled volume charge options for smaller general supply categories as at 31 March 2023 can continue to do so until further notice.

The irrigation capacity recovery charge category ISCR is only applied following a period of disconnection, and for a period equal to the duration of the disconnection, to ensure that the annual revenue requirement from irrigation connections is met (refer to our Pricing Policy document for more details).

The transmission proportion of each price and connection count for each category are disclosed in our pricing methodology document available on our website.

Against these prices, EA Networks provides a posted consumer discount payment back to customers in March each year. For details of this year's discount please refer to our Consumer Discount Methodology on the disclosure page of our website (www.eanetworks.co.nz/disclosures/).
