

Electrical Inspector

EA Networks is a utility business. We own and manage the local electricity distribution network, an advanced fibre optic network and operate a successful Field Services business that supports our networks as well as others.

We have an opportunity for an Electrical Inspector to join our Field Services team. This position will involve, retailer and EA meter installations. Field work with our internal staff. Inspections for EA and external contractors including new transformers, new connections, alterations, solar installs, wire checks, caravan WOF's and test and tagging electrical equipment, all in accordance with electrical codes, practices and standards. Attend to network projects, faults and switching as and when required. All necessary training will be given.

Ideally you will have the following attributes:

- Hold a current driver's licence with a minimum of class 1
- EWRB Registration as an Electrical Inspector or electrician with three years registration
- If an Electrician, willing to progress to an Electrical Inspector
- Electrically and mechanically minded
- Not afraid of demanding physical work in the rural environment
- Above average problem solving skills
- Vibrant and positive attitude
- Previous experience in a Network Distribution company would be an advantage

In return we offer; above average remuneration, some of the latest plant and equipment to work with, an active HS&E program and the opportunity to work with likeminded people that have a passion for what they do.

Ashburton is a vibrant and buoyant district. Just one hour from Christchurch Airport, it offers reasonably priced housing, good schools and a growing community infrastructure that is amount some of the best in New Zealand. We have all the great outdoor activities at our door step like hunting, fishing, mountain biking, boating and water skiing, along with world class snowboarding and skiing in winter.
