## Cable Jointer Supervisor

EA Networks has a strong focus on people, culture, and a commitment to leading edge technology. We own and operate our region's electricity distribution and fibre optic communications networks and are the trusted infrastructure platform that delivers electrical energy to every home and business in our region.

### About the role

We are seeking a Cable Jointer Supervisor who will organise and plan the execution of work for the underground department, while also providing technical advice when required. The successful candidate will also assist the Manager with the supervision of the Underground Team when required.

Your main responsibilities will include:

- Coordinating employees and other related parties to ensure assigned tasks meet required outcomes
- Preparation of job packs
- Preplanning site visits and regular site checks.
- Ensuring that plans/drawings/as built and other related documentation is up to date
- Completing required documentation for electrical compliance

To be successful in this role, you will:

- Have a qualification as an Electrician or a recognised National Certificate as a High voltage Cable Jointer (Would be an advantage)
- Have broad electrical knowledge
- Have experience of 400V, 11kV and or 22kV cable jointing and terminating
- Have excellent communication and documentation skills
- Be flexible to change and react in a positive way
- Be a great communicator

### Join Us
