

# Career Opportunities

## Listing:

### **Network Controller**

- *Part of a team who are responsible for the day-to-day operation of the electricity and fibre networks.*
- *Respond to changing network conditions and resolve emergency situations*
- *Manage operating orders and switching.*
- *Help us keep the lights on and our community connected*

## About EA Networks

At EA Networks, we are focused on ensuring our community has access to world class, reliable and affordable network infrastructure. We are the trusted infrastructure platform that delivers electrical energy to every home and business in our region. We own and operate our region's electricity distribution network and fibre optic communications network, which we continuously invest in to ensure that we keep the lights on and the web connected.

## About the role

As a Network Controller you will be part of a team that is responsible for overseeing the day-to-day control and operation of our electricity distribution and fibre networks. This involves monitoring the status of the networks, responding to and resolving emergency situations, undertaking planned and unplanned outage switching, preparing operating orders and facilitating procedures and processes that will assist staff, customers and contractors to effectively carryout works near and/or on our networks.

## Our location

Ashburton is a vibrant and buoyant district. Just one hour from Christchurch Airport, it offers reasonably priced housing, good schools and a growing community infrastructure that is among some of the best in New Zealand. We have all the great outdoor activities at our door step like hunting, fishing, mountain biking, boating and water skiing, along with world class snowboarding and skiing in winter.
